

3.6.1 The Maximum Value for a Column	322
3.6.2 The Row Holding the Maximum of a Certain Column	322
3.6.3 Maximum of Column per Group	323
3.6.4 The Rows Holding the Group-wise Maximum of a Certain Column	323
3.6.5 Using User-Defined Variables	324
3.6.6 Using Foreign Keys	324
3.6.7 Searching on Two Keys	326
3.6.8 Calculating Visits Per Day	326
3.6.9 Using AUTO_INCREMENT	327
3.7 Using MySQL with Apache	329
4 MySQL Programs	331
4.1 Overview of MySQL Programs	332
4.2 Using MySQL Programs	336
4.2.1 Invoking MySQL Programs	336
4.2.2 Specifying Program Options	336
4.2.3 Command Options for Connecting to the Server	350
4.2.4 Connecting to the MySQL Server Using Command Options	358
4.2.5 Connecting to the Server Using URI-Like Strings or Key-Value Pairs	361
4.2.6 Connecting to the Server Using DNS SRV Records	367
4.2.7 Connection Transport Protocols	369
4.2.8 Connection Compression Control	370
4.2.9 Setting Environment Variables	374
4.3 Server and Server-Startup Programs	375
4.3.1 <code>mysqld</code> — The MySQL Server	375
4.3.2 <code>mysqld_safe</code> — MySQL Server Startup Script	376
4.3.3 <code>mysql.server</code> — MySQL Server Startup Script	382
4.3.4 <code>mysqld_multi</code> — Manage Multiple MySQL Servers	384
4.4 Installation-Related Programs	388
4.4.1 <code>comp_err</code> — Compile MySQL Error Message File	388
4.4.2 <code>mysql_secure_installation</code> — Improve MySQL Installation Security	389
4.4.3 <code>mysql_ssl_rsa_setup</code> — Create SSL/RSA Files	393
4.4.4 <code>mysql_tzinfo_to_sql</code> — Load the Time Zone Tables	396
4.4.5 <code>mysql_upgrade</code> — Check and Upgrade MySQL Tables	396
4.5 Client Programs	405
4.5.1 <code>mysql</code> — The MySQL Command-Line Client	405
4.5.2 <code>mysqladmin</code> — A MySQL Server Administration Program	438
4.5.3 <code>mysqlcheck</code> — A Table Maintenance Program	449
4.5.4 <code>mysqldump</code> — A Database Backup Program	459
4.5.5 <code>mysqlimport</code> — A Data Import Program	485
4.5.6 <code>mysqlpump</code> — A Database Backup Program	493
4.5.7 <code>mysqlshow</code> — Display Database, Table, and Column Information	511
4.5.8 <code>mysqlslap</code> — A Load Emulation Client	519
4.6 Administrative and Utility Programs	529
4.6.1 <code>ibd2sdi</code> — InnoDB Tablespace SDI Extraction Utility	529
4.6.2 <code>innochecksum</code> — Offline InnoDB File Checksum Utility	533
4.6.3 <code>myisam_ftdump</code> — Display Full-Text Index information	538
4.6.4 <code>myisamchk</code> — MyISAM Table-Maintenance Utility	539
4.6.5 <code>myisamlog</code> — Display MyISAM Log File Contents	556
4.6.6 <code>myisampack</code> — Generate Compressed, Read-Only MyISAM Tables	557
4.6.7 <code>mysql_config_editor</code> — MySQL Configuration Utility	563
4.6.8 <code>mysqlbinlog</code> — Utility for Processing Binary Log Files	570
4.6.9 <code>mysqldumpslow</code> — Summarize Slow Query Log Files	596
4.7 Program Development Utilities	598
4.7.1 <code>mysql_config</code> — Display Options for Compiling Clients	598
